PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience designing and deploying production-ready cloud infrastructure using AWS, Kubernetes, Terraform, and Docker. Built and automated end-to-end deployment pipelines across both self-managed Kubernetes (kubeadm) and Amazon EKS using GitOps with ArgoCD and GitHub Actions. Passionate about Infrastructure as Code, platform automation, and AI-powered developer tooling, with experience building scalable DevOps solutions from infrastructure provisioning to application deployment.

TECHNICAL SKILLS

Cloud Platforms	AWS (EC2, EKS, VPC, IAM, S3, ALB, CloudWatch, DynamoDB, EBS)
Containers & Kubernetes	Docker, Docker Compose, Kubernetes (Kubeadm, EKS), Helm, Ingress-NGINX
CI/CD & GitOps	GitHub Actions, ArgoCD, Jenkins, Helm Charts, GitOps Workflows
Infrastructure as Code	Terraform (Modules, Remote State, DynamoDB Locking), Ansible
Monitoring	Prometheus, Grafana, CloudWatch Container Insights
Operating Systems	Linux (Ubuntu, Amazon Linux, Debian), Shell Scripting
Programming & Scripting	Python, Bash/Shell, YAML, JSON, HCL (Terraform), Jinja2 Templates
Databases	PostgreSQL, Redis, MySQL
AI Engineering	Ollama, LLM Integration, AI Agent Development, Async Python

PROFESSIONAL EXPERIENCE

Visys Cloud Technologies | DevOps Intern | 6 Months

- Built and automated CI/CD pipelines using GitHub Actions, Jenkins, Docker, and Helm to deploy containerized applications across AWS and Kubernetes environments.
- Provisioned cloud infrastructure on AWS using Terraform, managing EC2, VPC, IAM, S3, and remote state with DynamoDB while following Infrastructure as Code best practices.
- Deployed and managed applications on both self-managed Kubernetes (kubeadm) and Amazon EKS using Helm, ArgoCD, ConfigMaps, Secrets, and Ingress controllers.
- Automated Linux administration and application deployment with Ansible and Bash, while troubleshooting cloud infrastructure, Kubernetes workloads, and CI/CD pipelines.

EDUCATION

Bachelor of Engineering in Electronics and Instrumentation Engineering

Muffakham Jah College of Engineering and Technology | June 2019 - August 2023

PROFESSIONAL CERTIFICATIONS

DevOps Internship Certificate | Visys Cloud Technologies | 6-Month Industry Internship (AWS, Docker, Kubernetes, Terraform, CI/CD, Linux)

DevOps Internship Certificate | Elevate Labs | Hands-on training in CI/CD, Docker, Jenkins, and AWS infrastructure

FEATURED ENGINEERING PROJECTS

Production-grade implementations demonstrating end-to-end DevOps expertise from infrastructure provisioning to automated deployment.

SohailShop | [Production-Grade Django E-Commerce Platform on Kubernetes](#)

- Developed a production-ready Django e-commerce platform containerized with Docker and deployed across both kubeadm and Amazon EKS Kubernetes environments.
- Automated infrastructure provisioning and deployments using Terraform, Helm, GitHub Actions, and ArgoCD, enabling GitOps-based continuous delivery.
- Designed Kubernetes workloads using Deployments, StatefulSets, Ingress, ConfigMaps, Secrets, and Persistent Volumes with PostgreSQL and Redis.
- Implemented production practices including Docker optimization, init containers, health checks, remote Terraform state, and environment-specific Helm configurations.

Tech Stack:

Python • Django • Docker • Kubernetes • AWS • Terraform • Helm • ArgoCD • GitHub Actions • PostgreSQL • Redis

Engineering Impact:

Successfully demonstrated production deployments on both self-managed and managed Kubernetes using modern DevOps practices.

Sohail-Agent-CLI | [AI-Powered DevOps CLI for Infrastructure Automation](#)

- Architected a modular Python CLI with 12 specialized agents for repository inspection, planning, documentation, and infrastructure generation.
- Developed stack-aware repository analysis supporting 20+ technology stacks with deterministic generation of Docker, Kubernetes, and CI/CD assets.
- Built an AI-assisted planning engine using Ollama, structured decision records, and provider abstraction for intelligent engineering workflows.
- Implemented safety-first file operations, comprehensive automated testing, and extensible architecture using modern Python design patterns.

Tech Stack: Python • AsyncIO • Ollama • Pydantic • PyYAML • Rich • Pytest • Jinja2

Engineering Impact:

Automates DevOps project bootstrapping and infrastructure generation while improving developer productivity through AI-assisted engineering.

Jarvis AI | [Multimodal AI Desktop Assistant](#)

- Designed a modular Python architecture integrating computer vision, speech recognition, gesture control, automation, and graphical user interface components.
- Implemented real-time gesture recognition using OpenCV and MediaPipe with stable cursor control and desktop interaction.
- Integrated voice commands, speech synthesis, and desktop automation to enable hands-free interaction with system applications.
- Built an extensible framework for future AI integration while demonstrating real-time multimedia processing and Python system programming.

Tech Stack: Python • OpenCV • MediaPipe • SpeechRecognition • PyAutoGUI • Threading

Engineering Impact:

Demonstrates practical experience in computer vision, desktop automation, and modular Python application architecture.
